# 1 | Budget

## 1.1 Human resources

Since the project is a study the main cost is the human resources, that are the hours invested in the making of this paper. The hourly payment that an undergraduate student would get is not defined, but in order to have an approximation, it is taken as 15 €/hour. Since the total amount of hours is of 300 h, the total cost of the human resources is 4500 €.

## 1.2 Software

The development of this study required the use of different programs. Some of them are free, but others require a license to obtain them. They are listed in table 1.1.

Program	Price	Use
TeXstudio 2.12.4	-	Writing
Dev-C++	-	Development of the codes
Matlab	69 €	Post-processing of some data
Microsoft Excel 2010	79 €	Post-processing of some data
Mendeley Desktop 1.17.9	-	References management

Table 1.1: Software used

## 1.3 Hardware

The laptop used to develop the codes and the study and to run the simulation had an acquisition cost of approximately 970 €. Assuming a monthly payment of 25.52 €, since the project has run for 4 months, the overall cost of the hardware is 102.08 €.

## 1.4 Total

The total costs are summarized in table 1.2.

Concept	Price	Units	Total
Human resources	15 €/hour	300 h	4,500 €
Software	148 €	1	148 €
Hardware	25.52 €/month	4 months	102.08 €
			<b>4,750.08 €</b>
