1 | Smith-Hutton problem

In the following sections there are represented the results of the Smith-Hutton problem for all the resolution schemes that have been coded.

1.1 $\rho/\Gamma = 10$

Figure 1.1: Representation of the whole domain for $\rho/\Gamma = 10$ (CDS)

Figure 1.2: Representation of the whole domain for $\rho/\Gamma = 10$ (UDS)

Figure 1.3: Representation of the whole domain for $\rho/\Gamma = 10$ (HDS)

$$\rho/\Gamma = 10^3$$

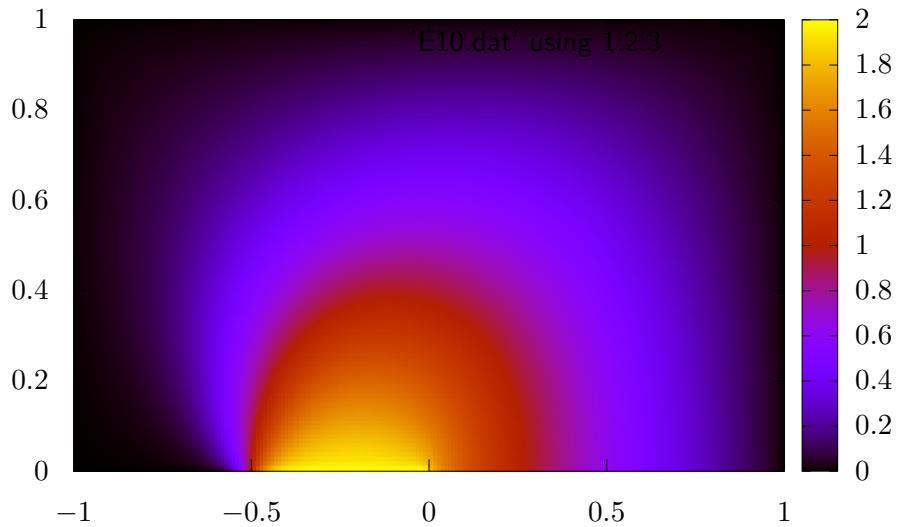

Figure 1.4: Representation of the whole domain for $\rho/\Gamma = 10$ (EDS)

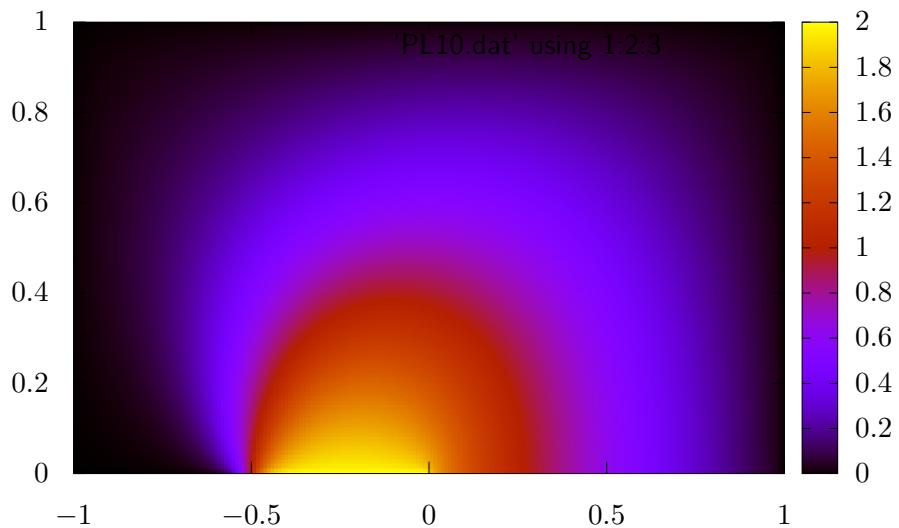

Figure 1.5: Representation of the whole domain for $\rho/\Gamma = 10$ (PLDS)

1.2 $\rho/\Gamma = 10^3$

In this section there is not a solution for the central differencing scheme because it diverges.

Figure 1.6: Representation of the whole domain for $\rho/\Gamma = 10^3$ (UDS)

Figure 1.7: Representation of the whole domain for $\rho/\Gamma = 10^3$ (HDS)

Figure 1.8: Representation of the whole domain for $\rho/\Gamma = 10^3$ (EDS)

Figure 1.9: Representation of the whole domain for $\rho/\Gamma = 10^3$ (PLDS)

1.3 $\rho/\Gamma = 10^6$

Like in the previous section, in this case there is no results for the central differencing scheme because of its divergence.

Figure 1.10: Representation of the whole domain for $\rho/\Gamma = 10^6$ (UDS)

Figure 1.11: Representation of the whole domain for $\rho/\Gamma = 10^6$ (HDS)

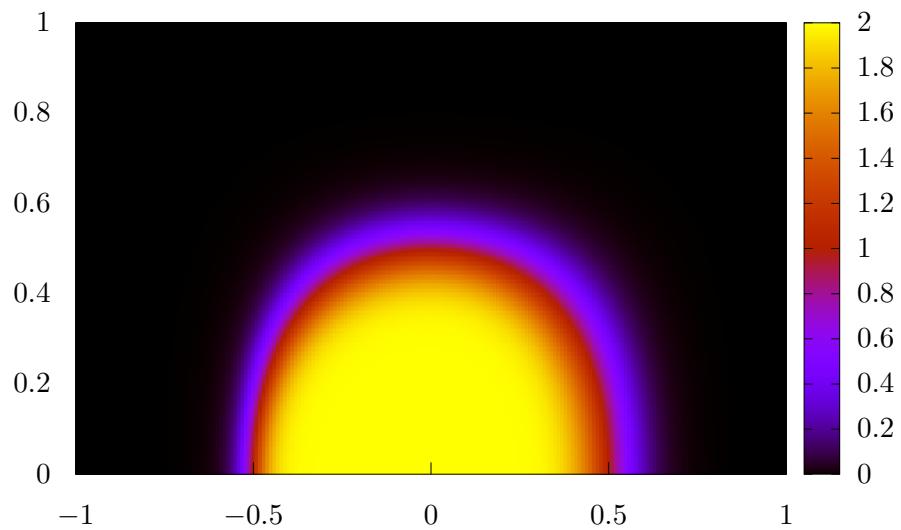

Figure 1.12: Representation of the whole domain for $\rho/\Gamma = 10^6$ (EDS)

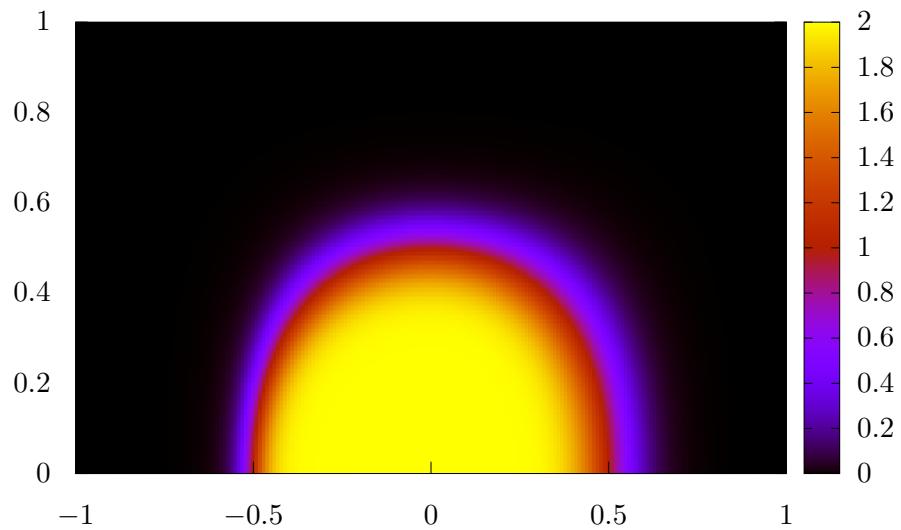

Figure 1.13: Representation of the whole domain for $\rho/\Gamma = 10^6$ (PLDS)
